

**Hays offers
Watersource
Heat Pump
HoseKits with
a variety of
flow rates
featuring our
Mesurflo™
Automatic
Balancing Valve.**

HoseKits are a convenient method of combining the advantages of flow control and a flexible connection. Our kits are supplied with a Mesurflo™ Automatic Balancing valve, a non-ported ball valve, two stainless steel braided hoses, and a ball valve with P/T ports. All kits are 100% leak tested before shipping!

Additional options are available upon request. Visit our website for more information regarding this product or call our knowledgeable customer service department.

Key features and competitive pricing are why Hays Fluid Controls is the ***Gold Standard*** of products in the HVAC industry and preferred over our competitors. See for yourself.

- * Operating differential pressure range of 2-80 PSI
- * Flow cartridges easily changed in the field
- * Non clogging - controls in less than perfect environments
- * Quiet Operation - vibration and noise are lowest in the industry
- * Unrestricted back flush
- * Stainless Steel Braided hoses only
